8th Grade Global Studies

The second semester of 8th grade will be a study in World Geography and Global Studies. This content provides a global perspective on contemporary issues. It is designed to create educated student leaders who are prepared to take action on 21st century global issues. This content area builds students' skills in understanding multiple perspectives on complex issues to promote investigations that lead to civic discourse and informed action around possible solutions.

The following scope and sequence provides space and time for schools who choose to incorporate individual student research projects based on the standards (e.g. National History Day, Decades Research Project, Chautauqua, or Project Based Learning). In addition, the expectation is that students will engage in learning about four to eight of the global issues based upon school goals, student interests, and time available. During the second semester, 8th grade students are provided an opportunity to choose an issue upon which to be civically engaged and take informed action. This can happen at any point in the semester, but it should be directly linked to course objectives and meet the disciplinary skills in the standards.

In the second semester of 8th grade, teachers and departments have some flexibility to make curricular choices. Departments are encouraged to allow time for individual student research projects (e.g. National History Day, Decades Research Project, Chautauqua, PBL). In addition, the expectation is that students will engage in learning regarding four to eight Global Issues based upon student interest and time available. A culminating 8th grade project should allow students opportunities to choose an issue upon which to be civically engaged and take informed action.
