

Finding Points on a Map

Locate the following places on the map:

1. What county is located at the 30°N Latitude and the Prime Meridian?
2. What city and country is located 30°N Latitude and 120°E Longitude?
3. What island country is closest to 15°S and 45°E on the map?
4. What river is located 30°N Latitude and 105°W Longitude?
5. What body of water is located 15°N and 60°W on the map?

Find the following coordinates (points) on the map:

6. Greenland (center of the country)
7. Guatemala
8. Mongolia
9. Baghdad, Iraq
10. Rio de Janeiro, Brasil

Answer the following:

11. What are lines of latitude?
12. What are lines of longitude?
13. What and where is the equator?
14. What and where is the Prime Meridian?
15. What degree of Latitude and Longitude is the North Pole located?

Bonus: Write down the city, state, and country you were born in and what point (approximately) it falls on the map.
